Hospitality networking

Uninterrupted connectivity for exceptional guest experiences

Mist™, Juniper Networks' AI-native networking platform, is the only platform built for enhancing guest experiences by simplifying network operations.

AI-native networks automate connectivity

Providing exceptional experiences

Whether it's to help guests navigate effectively inside a theme park or view a travel brochure via QR code, Juniper Networks ensures uninterrupted network connectivity no matter where you or your guests are.

● **Personalized guest experiences that drive revenue growth**

- Indoor location services to help guests navigate amenities or other offerings
- Real-time analytics for capturing insights into the guest experience

● **Streamlined network operations**

Through AIOps, Juniper Mist helps maximize your IT resources so you can focus on serving your customers.

- Ease of transition and ease of deployment
- Simplify capacity management inside your hotels, event venues, or MDUs

● **Protection for guest privacy and data**

- User data protection to maintain reputation
- Built on a Zero Trust architecture
- Secure edge for consistent user, device, and application security policies

Results

A strong partnership for upleveling the guest experience

"We cherish the Juniper innovation and culture. Juniper is our valued partner as citizenM redefines modern hospitality."

citizenM

Increased employee productivity

"Thai Airways chose Juniper as the most innovative and cost-effective network solution to ensure reliable connectivity and deliver an exceptional network experience to support employee productivity."

Thai Airways

Simplifying connectivity across multiple properties

"The experience working with Juniper Networks has been transformative. At Frasers Property in Australia, we believe that life's best experiences are created by people connecting in memorable places, and with an AI-driven network, we can make good on our promise. Juniper has brought the simplicity and speed of AI-driven operations and actions to our campus and branch networks, delivering superior and secure connectivity to end users."

Frasers Property

Secure networking to support operations

"From start to finish, Juniper has done a fantastic job on network design, performance, and flexibility. We are extremely happy with how well our Juniper network supports our luxury-first guests and our large staff of employees. Juniper is helping Baha Mar become an international hospitality leader."
